RX Aqua 2905

Is intended for gluing paper, cardboard and photos.

The package has a built-in applicator to facilitate application and ensure correct amount of glue.

- Does not wrinkle the paper
- Is transparent and colourless
- Odourless
- High dry content

TECHNICAL DATA

Basis: Water-soluble polymer
Solvent: Water
Consistency: Low viscous
Density: Approx. 1340 kg/m³
Dry solids: Approx. 70 %
Appearance: Colorless and transparent
Service temperature: +10°C to +50°C
Flash point: None

APPLICATION DATA

Application temperature: +15°C - +30°C
Drying time: 5 – 30 min depending on type of paper.
Relative humidity > 90 % should be avoided.
Storage life: At least two years in closed package.
May not be exposed to temperature below 0 °C and above 30 °C.

SURFACE PREPARATION

Joint interface must be clean, dry and free from oils, loose aggregates, laitance, release agents, waterproofing and other contaminants.

DIRECTIONS FOR USE

Apply a thin layer of glue on the surface which should be glued and put it on place.

Note: When gluing photos, avoid spilling of glue on photos and album paper in order to prevent the pages from being glued together.

The reason for this is that if the glue is exposed to high humidity, > 90 % RH, it will be sticky and when the climate later on gets drier the pages may stick together.

HANDLING AND CLEANING INSTRUCTIONS

Observe good cleanliness when working with the product.

Cleaning is best made with soap and water.

Keep out of reach of children.

Do not empty into drains.

ENVIRONMENTAL ASPECTS

For additional health and safety information consult the Safety Data Sheet.
