

# SCHÖNOX® iLINE® APP

## Design patented applicator for the SCHÖNOX iLINE system

for the efficient, ergonomic and clean treatment of SCHÖNOX iLINE adhesives in tubular bags. As a power unit a standard cordless screwdriver with sufficient capacity is used. Removeable blast pipes in two different sizes are available. Quick change of blast pipes without tools.

### Product characteristics

- within the same working time laying more m<sup>2</sup> of parquet
- clean work - in practice no adhesive residues on hands and on parquet
- component of SCHÖNOX iLINE
- cordless screwdriver as power unit
- no connecting cable
- ergonomic working in upright position
- easy handling
- minor cleaning work thanks to practical removeable blast pipe
- quick change of blast pipes without tools
- practical guidance function
- easy change of tubular bags
- precise dosing possible

### Applications

#### to work with:

- SCHÖNOX iLINE parquet adhesive

### Recommended method of working

- Place SCHÖNOX iLINE APP on the subfloor.
- Apply the adhesive evenly with SCHÖNOX iLINE APP to the substrate using the blast pipe. If wetting is insufficient adjust the bore diameter of the blast pipe or slow down the spreading speed.
- Use the wall or the edge of the parquet as side lay for the blast pipe to pull the applicator across the subfloor.
- Thereby press the push button to apply the adhesive in even crawlers.
- Stop in front of the opposite wall. Turn the applicator and apply the adhesive on the left area.
- As the power unit has stopped, press the return button for pressure reduction resp. allow the adhesive to drip off.
- Lift the device and lean against the wall. Take care to use an underlay in case adhesive drips off.

- The crawlers must build a straight and even line.
- If the conveyor output is too high, the adhesive builds sinuous lines. In this case reduce the conveyor output or move the applicator faster along the subfloor.

### Packaging

- SCHÖNOX iLINE APP exclusive including:
  - transport case
  - SCHÖNOX iLINE AK 290
  - SCHÖNOX iLINE AK 380
  - PTFE-Spray
  - all-purpose adhesive tape
  - instructions and safety manual
- SCHÖNOX iLINE APP in paper transport box including:
  - SCHÖNOX iLINE AK 290
  - instructions and safety manual

### Component parts

- SCHÖNOX iLINE AK 290
- SCHÖNOX iLINE AK 380

### Instructions

- The enclosed operating instructions and safety regulations must be observed.
- Cordless screwdrivers should have a sufficient capacity, at least a 13 mm drill chuck and should be equipped with an additional handhold.
- Recommended cordless screwdrivers:
  - Festool DRC 18/4 LI-Basic
  - Hitachi DS 18 DBL
  - Hilti SFH 14 A
  - Dewalt DCD 990
- Clean tools immediately after use with SCHÖNOX FIX CLEAN.
- After a longer period of not using the tool, still filled with a broached cubular bag, check the through hole to the blast pipe and remove stopper.
- Hardened material can only be removed mechanically.

# SCHÖNOX® iLINE® APP

- The product data sheets of further add-on products should be observed.

The applicable recommendations, guidelines, DIN regulations and safety data sheets are to be observed, together with the recognised architectural and engineering regulations. We guarantee that our products leave the factory in perfect condition. While our recommendations for use are based on tests and practical experience, they can only provide general guidance without any assurance as to product characteristics, since we have no influence over the conditions on site, the execution of the work or the method of processing. This product data sheet supersedes all previous editions.
